

ABOUT US

Since 2009, OpenEyes Technologies has been the chosen “Innovation Partner” for delivering high-quality IT services and products on time and within budget. Our unwavering focus on quality and security has enabled new heights of capability, efficiency, and reliability for professional associations, corporations, educational institutions, and government contractors.

We provide a range of technical development and strategic consulting services to build agility, integrate data assets, and transform technical assets of key business processes. Our aim is to help clients gain a competitive advantage with new or enhanced software products.

Services Offered

- Custom Software Solutions
- Web Applications
- Desktop Software
- Line of Business Applications
- Third-Party Integrations
- Content Management Systems
- Mainframe Applications

Headquartered in Washington, DC, our teams are located in the United States and India.

OUR APPROACH

Competence, creativity, honesty, proactivity, and delivering a genuinely satisfying customer experience are the guiding principles behind our way of working.

Core Principles

- We believe in the power of well-designed software to make lives better.
 - We work with experts who proactively manage a proven, systematic development process to make challenging implementations successful and rewarding.
 - We invest in understanding your technical requirements, strategic goals, initiatives, timelines, and organizational culture.
 - We invest in our staff so they remain expert, resourceful, engaged, and committed to your success.
-

WHO WE ARE

Assured Quality | Uncompromised Security | Valuable Mentoring

We are a trusted provider of strategic IT consulting and managed services with extensive expertise in converting ideas into effective software solutions. Our focus is to bring efficiency, speed, accuracy, and scalability into every system.

Our elite team of software engineers possesses hands-on expertise in leading-edge technologies and tools. We aim to be your long-term strategic partner and ensure that clients can rely on us for custom software development requirements.

We are committed to providing a secure environment for all aspects of data management, including:

- Data Sharing
- Data Integration
- Information Accessibility

We have successfully implemented controls to protect against unauthorized physical access, interference, and damage to equipment, information, and premises.

Your Information is Safe with Us!
